OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 7 (4-8 Oct 2026) - Period 1	Unit 2 - 2.1 Creative Photo Editing (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 7 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Unit 1 exit quiz: security measures secure; ~30% unsure when an online image may be reused (IP). Today: quick 'Can I use this image?' check before editing.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students use GIMP selection tools (Rectangle, Ellipse, Free, Fuzzy, By Color, Intelligent Scissors, Foreground Select) to isolate a subject and change the background. CSTA 3A-DA-09; ISTE 6.b; Sprint 2.1 obj. 1.

Success criteria — what will successful learning look / sound like?

I can choose the right selection tool for an object's edges; I can isolate a subject with Foreground Select and place it on a new background with clean edges.

Key knowledge / skill / understanding:

Selection = the area edits apply to; tool choice depends on edges/colour; layers keep the original safe.

Likely misconception / access or challenge need:

'Delete the background' = erase by hand; EAL learners need tool names shown with icons.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Think-pair-share ☒ Time: 8 min	Strategy: Problem solving ☒ Time: 22 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: Students view 3 photos (sharp-edged box, single-colour sky, person with complex outline). Individually choose the best selection tool for each, agree with a partner, then share and justify.	What students will do: Master Challenge 1: open an image with several objects (unit image pack), use Foreground Select to isolate one object, then add a new background on a separate layer. Save as .xcf and export .png.	What students will do: Pairs swap screens and check each other's edge quality, layer use and file saved, using a 3-point checklist; give one 'glow' and one 'grow'.
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Slide with 3 photos; mini-whiteboards; GIMP selection-tools icon card.	Resources: GIMP 2.10; image pack go.qubitscs.com/PXI2; student book Sprint 2.1; QR video p7LO.	Resources: Printed / Teams 3-point peer checklist.
Support (low performers / SEN): Icon card with tool name + picture + Arabic/English keyword.	Support (low performers / SEN): Step card with screenshots; start from a simple high-contrast image; teacher check-in at step 3.	Support (low performers / SEN): Checklist with sentence starters ('The edge is... because...').
Stretch (fast learners / gifted): Explain when Intelligent Scissors beats Fuzzy Select and why.	Stretch (fast learners / gifted): Use a hair/fur image and refine the mask; add a soft shadow so the subject sits naturally.	Stretch (fast learners / gifted): Suggest which other selection tool could improve the edge.

3 PREPARE — What do I need to do so students can succeed?		4 RESPOND — What will I do with what I see and hear?	
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned		If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve	
My setup / modelling: Time: 6 min Hook: show a before/after where a student photo of a school trip gets a new background. Share success criteria. Live-model on the board: Rectangle vs Fuzzy vs Foreground Select on one image; think aloud about edges; show the purple mask and Preview mask; key words on board: selection, mask, layer, foreground, export.		What I will watch for / likely responses: Students painting the whole image instead of the subject; forgetting to click Select/Enter so nothing is selected; editing the original layer with no backup; saving only .xcf. Likely responses: 'Fuzzy select for everything'. Probe: 'What happens at a blurry edge?'	
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Students choose a background from a place that matters to them (home country, Makkah, AIUla, a city skyline) - their culture becomes the design brief; peer feedback in pairs via Teams.		Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket (Forms, 3 Qs): match tool to image situation; name the menu where Foreground Select lives; one thing still unclear. 2 min left for learners' questions.	
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio		Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload exported .png + one sentence on which selection tool you used and why. Watch QR video 'Looks of image' (kCEN) for next lesson.	

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>							
What worked — and how do I know? Think-pair-share got EAL students talking: the icon card helped them name tools. 24/28 (10/1) produced a clean cut-out; exit tickets showed tool choice understood.		What will I change next time? Model Foreground Select twice: many skipped the 'click inside then paint' step. Pair a confident GIMP user with each new user from the start.		Students needing follow-up: 10/3 and 10/5: 4-5 students did not finish export (slow PC login). Recently arrived EAL students: check tool vocabulary next lesson.			

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☒1 ☐2 ☐3 ☒C ☐H	Numeracy numbers / data · 2-1-1-6 ☐1 ☒2 ☐3 ☐C ☐H	Digital students use it · 2-1-1-4 ☒1 ☒2 ☒3 ☐C ☒H	Digital research trusted sources · 2-1-1-4 ☐1 ☐2 ☐3 ☐C ☒H	Real-life ① application · 2-1-1-5 ☐1 ☒2 ☐3 ☐C ☐H	Real-life ② application · 2-1-1-5 ☐1 ☐2 ☐3 ☐C ☒H	Inquiry experiment / research · 2-1-1-7 ☒1 ☐2 ☐3 ☐C ☐H	Thinking problem-solving · 2-1-1-7 ☒1 ☒2 ☐3 ☐C ☐H

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 7 (4-8 Oct 2026) - Period 2	Unit 2 - 2.1 Creative Photo Editing (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 7 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket P1: 85% matched selection tools; Foreground Select steps shaky for ~5 per class. 3-min re-demo, then filters and painting effects.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students change the look of images with GIMP filters: Old Photo (Defocus, Sepia, Mottle, Border), and painting effects GIMPpressionist, Apply Canvas and Oilify. Sprint 2.1 obj. 2-4; Challenges 2-3; ISTE 6.b.

Success criteria — what will successful learning look / sound like?

I can turn a photo into an old-looking photograph with Filters > Decor > Old Photo; I can apply 2 artistic filters and explain what at least 2 settings change.

Key knowledge / skill / understanding:

Filters change pixel characteristics; Preview before OK; Work on Copy protects the original.

Likely misconception / access or challenge need:

Sepia = grayscale; more effects = better art. EAL: explain 'mottle', 'jagged', 'brush stroke'.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☒ Time: 6 min	Strategy: Stations / carousel ☒ Time: 22 min	Strategy: Gamification ☒ Time: 8 min
What students will do: Compare a modern and an old-look photo of the same monument. Pairs list 3 visible differences and guess which Old Photo options made them.	What students will do: Challenge 3 + Challenge 2 as stations (7 min each): A) monument from your own heritage > Old Photo with border; B) GIMPpressionist (Paper/Brush tabs); C) Apply Canvas + Oilify. Record one setting and its effect per station.	What students will do: Quizizz 'Name that filter': see an edited image, pick the filter/setting used; bonus for the menu path.
Evidence tool: Oral questioning ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Observation checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Digital quiz (Forms / Kahoot / Quizizz) ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group
Resources: Before/after monument slide; vocabulary list (border, jagged, filter).	Resources: GIMP; image pack PXI2; Wikimedia Commons; QR videos kCEN, 1CA9; station cards.	Resources: Quizizz with 8 image questions.
Support (low performers / SEN): Picture vocabulary; frame 'It looks ... because ...'.	Support (low performers / SEN): Station cards with numbered screenshots; images pre-resized to 1200 px.	Support (low performers / SEN): Image-based answers; play in teams if needed.
Stretch (fast learners / gifted): Predict what each Old Photo checkbox changes before testing.	Stretch (fast learners / gifted): Combine 2 effects on separate layers with opacity; add a credit line.	Stretch (fast learners / gifted): Bonus: exact menu path for each filter.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 7 min

Retrieval: 3-min re-demo of Foreground Select. Hook: 'How would this monument have looked in 1920?' Model Filters > Decor > Old Photo (Defocus, Sepia, Mottle, Border Size, Work on Copy), then Filters > Artistic > GIMPpressionist with Preview on. Explain station rotation and the credit line: 'Photo: name, source'.

What is new or innovative in this lesson? (ETEC looks for this)

Culturally responsive brief: each student ages a monument from their own heritage, building a class 'world gallery'; stations keep everyone hands-on.

Progress recorded / shared:

- ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Watermarked images (IP link); filters applied to the wrong layer; large images freezing PCs on Oilify; no image credit. Likely: 'Sepia makes it black and white' / 'I see no change' (settings too small).

Close / exit check (summative + time for learners' questions) Time: 7 min

Gallery: 3 students show work and name one setting. Exit check (Forms, 2 Qs) on Old Photo options + artistic filters. Learners' questions.

Homework / platform (e.g. Madrasati)

Madrasati: upload your old-photo monument + one painted image with source credits. Watch QR 'Enhance color' (aCT4).

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Heritage monuments got strong engagement: Egyptian, Pakistani, Filipino and Saudi students shared stories. Quizizz: 80% named the filter correctly.

What will I change next time?

Resize images before class (2 PCs froze on Oilify). Give the trusted image-site list at the start to save search time.

Students needing follow-up:

10/2 and 10/6: about 5 students did not finish station C. Two SEN students need printed station cards.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 8 (11-15 Oct 2026) - Period 1	Unit 2 - 2.2 Advance Photo Editing
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 8 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Uploads: 80% submitted; credits improving. Exit check showed filters secure. Today: colour correction and repair tools, with an export routine.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students improve colour (Color Enhance, Color Balance), straighten an image, and repair photos with Red Eye Removal, Clone and Despeckle; export .png/.gif. Sprint 2.2 obj. 1-5; Challenges 1-3; CSTA 3A-DA-09.

Success criteria — what will successful learning look / sound like?

I can balance colour by range (shadows/midtones/highlights); I can straighten with the Measure tool; I can use 2 of 3 repair tools; I export in the right format.

Key knowledge / skill / understanding:

Colour = RGB values; Clone is a Paint tool copying pixels; Despeckle reduces noise; .gif limited to 256 colours.

Likely misconception / access or challenge need:

Brightness = colour balance; Clone = copy/paste a layer; red eye can't be fixed.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Storytelling ☒ Time: 6 min	Strategy: Stations / carousel ☒ Time: 24 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: 'Tina's family photo' (exercise Q3): a tilted, dull flash photo with red eyes. Students list what is wrong and which tool fixes each problem on whiteboards.	What students will do: Four repair stations (6 min each): 1) Color Enhance + Color Balance, export .png; 2) Measure tool > Straighten; 3) Red Eye Removal with Threshold; 4) Clone a pattern (Ctrl+click) or Despeckle a noisy scan, export .gif.	What students will do: Groups make a 'repair guide' card for one tool (menu path, 3 steps, one tip) and post it on Teams as a class help library for the Unit 2 assessment.
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: Story slide; whiteboards.	Resources: GIMP; images from pack; QR videos aCT4, hCYG, WCUC, KCIT, oCOW; station cards.	Resources: Teams channel; card template.
Support (low performers / SEN): Picture story with key words: flash, tilt, dull.	Support (low performers / SEN): Station cards with screenshots; peer helper at each station; aim for 2 stations.	Support (low performers / SEN): Template with headings filled.
Stretch (fast learners / gifted): Explain why red eye happens (light reflecting off the retina).	Stretch (fast learners / gifted): Hide an unwanted object with Clone so no one can tell; compare .png vs .gif file sizes.	Stretch (fast learners / gifted): Add a 'common mistake + fix' box.

3 PREPARE — What do I need to do so students can succeed?	4 RESPOND — What will I do with what I see and hear?
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned	If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve
My setup / modelling: Time: 6 min Hook: three damaged photos (dull, tilted, red eye). Model in 1 minute each: Colors > Color Balance by range; Measure tool > Straighten; select eyes > Filters > Enhance > Red Eye Removal; Ctrl+click clone source. Show the export routine: File > Export As > type > Export. Explain station timer.	What I will watch for / likely responses: Color Balance without choosing a range; measuring a vertical line; Red Eye without selecting eyes; Clone source not set; 'Save' vs 'Export' confusion; .gif losing colours. Likely: over-saturated colours - ask 'Does it look natural?'
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Four-station repair lab plus a student-made help library on Teams that is reused for assessment revision.	Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket (Forms): which menu holds Color Enhance; Clone belongs to which tool group; why did the .gif look different? Learners' questions.
Progress recorded / shared: ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio	Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload one before/after repaired photo. Complete Unit 2 'Match the following' and 'Fill in the blanks'.

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Stations moved quickly with timers; repair cards used Arabic + English labels, which helped EAL peers. Most completed 3 of 4 stations.	What will I change next time? Four stations in one period is tight: give a 1-minute reset and let slower groups do 2 stations. Explain the .gif palette limit before station 4.	Students needing follow-up: 10/1, 10/5: a few students confused Clone with copy/paste. Parents of 3 students informed about missing uploads.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☒ 3 ☒ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☐ 1 ☒ 2 ☐ 3 ☒ C ☐ H	Digital students use it · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Real-life ① application · 2-1-1-5 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☒ 2 ☐ 3 ☐ C ☐ H

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 8 (11-15 Oct 2026) - Period 2	Unit 2 - 2.3 Advance Video Editing (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 8 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Repair stations: 3 of 4 done by most; .gif palette now understood. Today we move to video, starting with resolution and aspect ratio numbers.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students set a project profile in OpenShot (resolution, aspect ratio, frame rate), import media files and modify clips on the timeline (trim, split, arrange, transitions). Sprint 2.3 obj. 1-3; ISTE 6.a.

Key knowledge / skill / understanding:

Profile = resolution + aspect ratio + fps; timeline tracks layer media; transitions join clips.

Success criteria — what will successful learning look / sound like?

I can pick a suitable profile and explain resolution, aspect ratio and frame rate; I can import media, trim/split clips and add a transition.

Likely misconception / access or challenge need:

Higher fps always better; aspect ratio = resolution; editing the original files.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 20 min	Strategy: Role play ☒ Time: 8 min
What students will do: Compare a 16:9 and a 9:16 clip of the same scene. Discuss: Which platform suits each? What do 1920x1080 and 30 fps mean? Calculate frames in a 10-second clip.	What students will do: Follow along: create a project with a chosen profile, File > Import Files, drag clips to tracks, trim and split with Razor, reorder, add 2 transitions between clips. Save project.	What students will do: Pairs: 'client and editor'. Client gives a 15-second brief (e.g., school sports day reel); editor explains which profile and transitions they would choose and why.
Evidence tool: Oral questioning ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Two sample clips; profile info slide.	Resources: OpenShot; sample videos go.qubitcs.com/vXP1; QR install 338u.	Resources: Brief cards; checklist.
Support (low performers / SEN): Glossary card: resolution, aspect ratio, frame rate, with diagrams.	Support (low performers / SEN): Clips pre-downloaded; step card; work with 2 clips only.	Support (low performers / SEN): Brief cards with choices to pick from.
Stretch (fast learners / gifted): Compare data size of 24 vs 60 fps for the same clip.	Stretch (fast learners / gifted): Use 4 clips and match transition style to the story.	Stretch (fast learners / gifted): Editor adds a justification using numbers (fps, resolution).

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: 15-sec school-event reel made in OpenShot. Model: Choose Profile; import; drag to track; Razor tool; drag-to-overlap transition; save .osp. Name the panels (Project Files, Timeline, Preview). Share success criteria.

What is new or innovative in this lesson? (ETEC looks for this)

Role play client/editor brings real-world media-industry language; numeracy through fps x seconds and resolution calculations.

Progress recorded / shared:

- ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Wrong profile mismatch leading to black bars; clips placed on the same track overlapping by accident; not saving project; OpenShot crash on slow PCs (save often). Response: 'the video looks stretched'.

Close / exit check (summative + time for learners' questions) Time: 8 min

Exit ticket: 1) define aspect ratio 2) frames in 12 s at 25 fps 3) one transition you used. Learners' questions.

Homework / platform (e.g. Madrasati)

Madrasati: plan a 20-second video (storyboard of 4 frames) on 'My culture in 20 seconds' - photos/clips must be your own or royalty-free.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Numbers made sense when calculated with the real clip; role play produced good vocabulary. Most saved a project with 2 transitions.

What will I change next time?

OpenShot was slow on 6 PCs - install check before the lesson and keep clips short (under 30 s). Give the profile glossary earlier.

Students needing follow-up:

Students with no OpenShot at home: provide lab time on Tuesday break. 10/3: 2 SEN students need 1:1 check on the timeline.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

ALWAYS VISIBLE IN DELIVERY: Safe, respectful climate • every learner drawn in • purposeful use of time • smooth transitions • learner voice • specific feedback and next steps • students act on feedback

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 9 (18-22 Oct 2026) - Period 1	Unit 2 - 2.3 Advance Video Editing (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 9 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Storyboards: 75% submitted; strong cultural ideas. Exit ticket fps calc 80% correct. Today: effects, audio, keyframe animation and export.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students add video effects, work with audio (echo, compressor), create keyframe animations and export in Simple vs Advanced mode. Sprint 2.3 obj. 3-6; Challenges 1-3; Mass. 9-12.CAS.c.4.

Success criteria — what will successful learning look / sound like?

I can add at least 2 video effects and 1 audio effect; I can animate a property with keyframes; I can export in Simple and Advanced mode and explain the difference.

Key knowledge / skill / understanding:

Keyframe = property value at a time; effects change clips; Advanced export controls codecs/bitrate.

Likely misconception / access or challenge need:

Animation needs drawing; Compressor makes the file smaller (it changes audio volume range).

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 10 min	Strategy: Project-based task ☐ Time: 20 min	Strategy: Discussion / dialogue ☐ Time: 8 min
What students will do: Watch-and-do: right-click clip > Properties; move playhead; set Scale/Location; Insert Keyframe twice to create a zoom/slide animation.	What students will do: Build 'My culture in 20 seconds' from the storyboard: up to 5 animations, 2 video effects, one audio effect and a caption for accessibility. Export in Simple mode, then try Advanced.	What students will do: Three volunteers present their 20-second video; class gives 'two stars and a wish' through Teams chat.
Evidence tool: Mini-whiteboards ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Rubric ☐ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: OpenShot; QR video 2CPA; sample clip.	Resources: OpenShot; student storyboards; royalty-free music list; rubric.	Resources: Display board; Teams chat.
Support (low performers / SEN): Paused video steps; teacher at front with a 'helper desk'.	Support (low performers / SEN): Shortened task: 3 clips, 2 animations, 1 effect; template project.	Support (low performers / SEN): Sentence starters for feedback.
Stretch (fast learners / gifted): Animate 3 properties at once (scale, rotation, alpha).	Stretch (fast learners / gifted): Add closed captions and compare Simple vs Advanced export file sizes.	Stretch (fast learners / gifted): Comment using technical terms (keyframe, codec, transition).

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 5 min Hook: same clip with and without animation and audio effects. Model Effects tab drag-and-drop, audio Echo vs Compressor, Insert Keyframe, and File > Export Project > Export Video (Simple vs Advanced). Share rubric with 4 criteria.				What I will watch for / likely responses: Keyframes not appearing because playhead not moved; music used without permission (copyright reminder); export taking too long - use 720p for class. Response: 'Compressor compresses the file'.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Accessibility: every video must include a caption (Mass. 9-12.CAS.c.4); students celebrate their cultural backgrounds in their videos.				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit check (Forms): Simple vs Advanced export - give one difference; what does Echo do? Learners' questions + reminder of Unit 2 assessment next lesson.			
Progress recorded / shared: ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload the exported video (<= 50 MB). Revise Unit 2 using the class repair-guide cards and exercise questions.			
5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>							
What worked — and how do I know? Videos showed real pride: Sudanese, Indian, Filipino and Saudi students shared traditions respectfully. Captions done by 70%. Presentations built confidence.			What will I change next time? Give export in 720p by default; 4 exports failed at 1080p. Spend more time on keyframe concept with a paper timeline first.		Students needing follow-up: Students who did not export (approx. 3 per class) to finish at lunch lab. Remind 2 students about using copyrighted music.		
COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Digital students use it · 2-1-1-4 ☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Real-life ① application · 2-1-1-5 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Inquiry experiment / research · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H
Create something new · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Discussion expressing ideas · 2-1-1-8 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Pair / group cooperative work · 2-1-1-8 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Learner choice independent work · 3-2-1-6 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Self-assessment 2-2-1-1 ☐ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Peer assessment 2-2-1-1 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	SEN / low specific support · 2-1-1-3 ☒ 1 ☒ 2 ☒ 3 ☐ C ☐ H	Gifted specific stretch · 2-1-1-3 ☒ 1 ☒ 2 ☒ 3 ☐ C ☐ H
ALWAYS VISIBLE IN DELIVERY: Safe, respectful climate • every learner drawn in • purposeful use of time • smooth transitions • learner voice • specific feedback and next steps • students act on feedback							

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 9 (18-22 Oct 2026) - Period 2	Unit 2 - Assessment (Photo & Video Editing)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 9 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Videos submitted by ~85%; keyframes and export modes understood by most. Today's assessment checks all Unit 2 outcomes; extra time for SEN.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS) Assess Unit 2: selection tools, filters, colour tools, repair tools (GIMP) and OpenShot profiles, effects and export, through a written quiz and a practical task aligned to the ToS. Sprint 2.1-2.3.	Success criteria — what will successful learning look / sound like? I answer MCQ, fill-in and matching items accurately; I complete a practical GIMP task to the given specification; I reflect honestly on my Unit 2 progress.
Key knowledge / skill / understanding: All Unit 2 vocabulary: border, filters, jagged, pattern, brush stroke, compress, time-lapse, keyframe.	Likely misconception / access or challenge need: Rushing the practical without reading the spec; EAL students: read questions aloud if needed.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Problem solving ☒ Time: 15 min	Strategy: Project-based task ☒ Time: 22 min	Strategy: Discussion / dialogue ☒ Time: 5 min
What students will do: Written section (Forms): 6 MCQ, 4 fill-in-the-blanks, 5 match-the-following and 2 short answers (Simple vs Advanced export; how to make an image look old).	What students will do: Practical: given an image pack, isolate a subject, place it on a new background, apply one colour correction and one artistic filter, then export as .png with a credit line.	What students will do: Self-assessment: students rate their confidence on each Unit 2 skill (traffic light) and write one target for the next unit.
Evidence tool: Short quiz ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Self-assessment checklist ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group
Resources: Forms quiz from Unit 2 exercise bank; ToS.	Resources: GIMP; assessment image pack; practical spec + marking rubric.	Resources: Traffic-light self-assessment sheet (Forms).
Support (low performers / SEN): Read-aloud option; glossary allowed for EAL; +10% time for SEN.	Support (low performers / SEN): Simplified spec with checklist ticks.	Support (low performers / SEN): Smiley-face scale + short phrases.
Stretch (fast learners / gifted): Extended answer: compare two background-removal methods.	Stretch (fast learners / gifted): Add a clone repair and a fuzzy border; justify choices in 2 lines.	Stretch (fast learners / gifted): Write a personal learning goal (ISTE 1.a).

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 4 min

Clear instructions: timing, rules for practical, where to save (Assessments folder, file name Class_Name_U2). Read through the rubric and success criteria. Remind students to check spelling of file names. No modelling; quick reassurance for anxious learners.

What is new or innovative in this lesson? (ETEC looks for this)

Assessment combines a digital auto-marked quiz with a practical rubric and student self-assessment, giving 3 types of evidence.

Progress recorded / shared:

- ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Students stuck on export; students opening the internet for answers; anxiety among new students - circulate calmly, read questions aloud on request, keep extra time for SEN plan.

Close / exit check (summative + time for learners' questions) Time: 4 min

Collect files; quick 1-minute check that every file is saved correctly. Learners' questions about next unit (Game Interface).

Homework / platform (e.g. Madrasati)

Madrasati: preview Unit 3 - install VS Code at home if possible (QR yCJk) and bring 1 idea for a simple web game.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Quiz average approx. 76%; practical rubric average level 3. Self-assessment matched teacher marks for most students - they know their gaps.

What will I change next time?

Practical spec was long for EAL learners: use bullet icons next time. Allow 5 more minutes for the practical.

Students needing follow-up:

Students below 50% (approx. 2-3 per class) for re-teach of selection tools; inform parents via gradebook comment.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 10 (25-29 Oct 2026) - Period 1	Unit 3 - 3.1 Web Interface for the Game (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 10 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Unit 2 test avg 76%; selection tools weakest. Short re-teach sheet sent. New unit: start from students' game ideas from homework.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students set up the 'Bit by Bit' worm-game project: folder structure, naming (camel/kebab case), VS Code, and the HTML structure of the index page. Sprint 3.1 obj. 1; ISTE 4.a; Mass. 9-12.DTC.a.1; CSTA 3A-AP-16.

Success criteria — what will successful learning look / sound like?

I create the correct folder structure (html, css, js, images, audio); I name files in kebab case; I write a valid index.html with head, body, header, sections and form elements.

Key knowledge / skill / understanding:

HTML structures content; folders keep projects organised; naming conventions avoid broken links.

Likely misconception / access or challenge need:

Spaces in file names are fine; HTML styles the page; EAL: 'hierarchy', 'kebab case'.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Brainstorming ☒ Time: 7 min	Strategy: Modelling / worked exam ☒ Time: 22 min	Strategy: Think-pair-share ☒ Time: 8 min
What students will do: Groups brainstorm what a 'catch the worm' vermicompost game needs on the start page (title, player name, glove choice, start button) and sketch the layout.	What students will do: Download the resource folder; create folders and kebab-case files; in VS Code write index.html structure (doctype, head, title, header, main, form, input, button) following the teacher.	What students will do: Pairs examine 3 file names and 3 code snippets; decide which follow camel/kebab case and which HTML has errors, then share fixes.
Evidence tool: Observation checklist ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Mini-whiteboards ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: A3 paper/markers; vermicompost picture (real-life link).	Resources: VS Code; resource folder go.qubitcs.com/cXAd; QR LCdB; source file h9pt.	Resources: Slide with snippets; mini-whiteboards.
Support (low performers / SEN): Picture prompts of game screens.	Support (low performers / SEN): Starter index.html with comments marking where to type.	Support (low performers / SEN): Highlighted lines to focus on.
Stretch (fast learners / gifted): Add an accessibility feature to the sketch.	Stretch (fast learners / gifted): Add semantic tags and alt text; validate the page with the W3C validator.	Stretch (fast learners / gifted): Rewrite a snippet using semantic HTML.

3 PREPARE — What do I need to do so students can succeed?		4 RESPOND — What will I do with what I see and hear?	
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned		If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve	
My setup / modelling: Time: 6 min Hook: play the finished worm game for 1 minute. Real-life link: vermicompost (earthworms recycle food waste - school garden). Model folder setup and VS Code basics (Explorer, Live Server/open in browser). Key words: camel case, kebab case, hierarchy, element, tag.		What I will watch for / likely responses: Files saved in Downloads not the project folder; missing closing tags; uppercase/space file names; students copying the source file without understanding. Response: 'my page is blank' - file not saved/opened.	
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Students build a real browser game across Units 3-4, linked to sustainability (vermicompost) - a project that grows each lesson.		Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket: write the correct folder tree and one kebab-case file name; one question for the teacher. Learners' questions.	
Progress recorded / shared: ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio		Homework / platform <i>(e.g. Madrasati)</i> Madrasati: complete Challenge 1 page-structure sketch for a personal website (drawing + 5 HTML tags you would use).	

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>							
What worked — and how do I know? Game demo hooked everyone; vermicompost link sparked talk about recycling practices in different home countries. Folder structure done by 90%.		What will I change next time? Check VS Code is installed on all lab PCs before the unit (lost 5 minutes in 10/4). Keep the starter file for SEN.		Students needing follow-up: Students new to coding (mainly recent arrivals) need a 'tags cheat sheet'; 3 students did not save in the right folder.			

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>

--

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 10 (25-29 Oct 2026) - Period 2	Unit 3 - 3.1 Web Interface for the Game (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 10 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket: 88% correct folder tree; closing-tag errors common. Today: start with a 'spot the bug' and build the game page.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students build the HTML structure of the game page (score, worm count, holes grid, tray, gloves, buttons) and plan a page structure from a layout. Sprint 3.1 obj. 1; Challenges 2-3; CSTA 3A-AP-17.

Success criteria — what will successful learning look / sound like?

I break a layout into header/container divs; I write the game page HTML with ids/classes for each part; my page opens without errors.

Key knowledge / skill / understanding:

div containers, id vs class, nesting creates hierarchy; plan structure before coding.

Likely misconception / access or challenge need:

id and class are the same; every element needs its own CSS file.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Problem solving ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 22 min	Strategy: Jigsaw ☒ Time: 7 min
What students will do: Challenge 2: convert a given web page screenshot into a page-structure diagram (header, innerHeader1/2, container, innerContainer1/2).	What students will do: Code game.html: header with score and worm count, a holes container with 9 holes (div), worm tray, glove area, and buttons, each with ids/classes as in the source file.	What students will do: Expert groups each explain one part of the page (header, holes, tray, gloves) to a mixed group, using their code.
Evidence tool: Open-ended task ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Oral questioning ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: Printed screenshot; diagram template.	Resources: VS Code; QR nCfN; source file F9aL.	Resources: Each student's code; jigsaw cards.
Support (low performers / SEN): Template with boxes pre-drawn.	Support (low performers / SEN): Partially completed game.html; colour-coded nesting guide.	Support (low performers / SEN): Expert role card with prompts.
Stretch (fast learners / gifted): Add class names using camel case.	Stretch (fast learners / gifted): Use a loop-friendly naming pattern (hole1-hole9) and comment each section.	Stretch (fast learners / gifted): Explain how this structure will help JavaScript later.

3 PREPARE — What do I need to do so students can succeed?	4 RESPOND — What will I do with what I see and hear?
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned	If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve
My setup / modelling: Time: 6 min Spot the bug: 3 HTML lines with missing closing tags. Model planning on paper first: draw boxes for the game page, then translate into nested divs. Explain id (unique) vs class (shared). Share success criteria.	What I will watch for / likely responses: Mis-nested divs; duplicate ids; students not linking files later; copying without understanding - ask 'what will this div hold?'. Likely response: 'Can I just use class for everything?'
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Jigsaw: every student becomes an 'expert' explaining one part of the game structure - builds learner voice and collaboration across language groups.	Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit check: label the structure diagram of the game page with correct tags; learners' questions.
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio	Homework / platform <i>(e.g. Madrasati)</i> Madrasati: Challenge 3 - draw a responsive image-gallery layout and write its HTML (no CSS yet).

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know? Planning on paper first reduced nesting errors a lot. Jigsaw groups mixing Arabic, Urdu and English speakers worked; experts were proud to explain.	What will I change next time? Give more time for the game page; 30% needed the starter file. Shorten jigsaw to 2 rounds.	Students needing follow-up: 10/2 and 10/6: 4 students with duplicate ids to fix. Gifted coders could start the gallery challenge in class.

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 11 (1-5 Nov 2026) - Period 1	Unit 3 - 3.2 Styling the Game Page (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 11 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Game pages complete for ~85%; gallery homework shows good layouts but weak HTML structure. Today: CSS Flexbox to lay out index page.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS) Students use CSS Flexbox (display:flex, flex-direction, justify-content, align-items, gap, flex-wrap) to style and lay out the index page. Sprint 3.2 obj. 1-2; Challenges 1-2; CSTA 3A-AP-16.	Success criteria — what will successful learning look / sound like? I link style.css; I use at least 4 flex properties correctly; my index page items are centred and spaced as in the design.
Key knowledge / skill / understanding: CSS selectors target elements; Flexbox arranges items along a main axis and a cross axis.	Likely misconception / access or challenge need: justify-content and align-items are the same; CSS must be inside HTML.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Gamification ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 22 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: Flexbox Froggy-style challenge: on a projected game, teams predict the flex rule that moves the items into place and test it live.	What students will do: Challenge 1 then apply to project: create a div/flex layout as shown, then style index.html (body, header, form, buttons) with flex for centring and spacing.	What students will do: Pairs test each other's index page on a laptop and a phone-size window and record one layout issue + fix.
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Flexbox practice page; display board.	Resources: VS Code; QR Flex properties; project CSS source; Challenge 1 picture.	Resources: Browser DevTools device mode; checklist.
Support (low performers / SEN): Property card with arrows showing axes.	Support (low performers / SEN): Starter CSS with gaps to fill (justify-content: ____).	Support (low performers / SEN): Checklist with pictures of good/bad layout.
Stretch (fast learners / gifted): Combine 3 properties in one answer.	Stretch (fast learners / gifted): Challenge 2: four background-image divs centred in a row with flex-wrap for small screens.	Stretch (fast learners / gifted): Suggest a media query to fix the issue.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 6 min Hook: same page without and with CSS. Link stylesheet live. Draw main axis/cross axis on the board; model display:flex, justify-content, align-items, flex-direction with immediate browser refresh. Show DevTools to inspect.				What I will watch for / likely responses: Stylesheet path wrong (no styling at all); applying flex to the child not the parent; typos in property names. Likely response: 'nothing moves' - flex on wrong element.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Learning flex through a team game then transferring it to the real project; DevTools device mode introduces responsive testing.				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket: given a picture of a layout, write the 3 flex properties needed. Learners' questions.			
Progress recorded / shared: ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: complete Challenge 2 (four divs with background images in a row) or finish index styling; upload screenshot.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Gamified start worked; teams with mixed backgrounds cheered each other. Most applied flex correctly after the axis drawing.	What will I change next time? Check the CSS link step first - 6 students lost time. Provide a printable flex cheat sheet.	Students needing follow-up: Students who still mix up parent/child selectors (approx. 3 per class) - targeted mini re-teach next lesson.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Digital students use it · 2-1-1-4 ☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Real-life ① application · 2-1-1-5 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☒ 2 ☐ 3 ☐ C ☐ H

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 11 (1-5 Nov 2026) - Period 2	Unit 3 - 3.2 Styling the Game Page (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 11 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket: 80% wrote correct flex rules; parent/child confusion remains. 3-min re-teach, then style the game page.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students design the glove customisation area and style the game page (holes grid, score board, tray) with a responsive layout. Sprint 3.2 obj. 3-4; Challenge 3; CSTA 3A-AP-21; ISTE 4.c.

Success criteria — what will successful learning look / sound like?

I style the glove area so the selected glove is highlighted; I style holes and score with consistent colours/fonts; my game page works on laptop and phone widths.

Key knowledge / skill / understanding:

Classes reuse styles; :hover/:focus; responsive layouts with flex-wrap and media queries.

Likely misconception / access or challenge need:

Fixed pixel widths make it responsive; more colours = better design.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☒ Time: 6 min	Strategy: Project-based task ☒ Time: 24 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: Discuss good game UI: show 3 game screens; class agrees on 4 design rules (contrast, consistent font, clear buttons, space).	What students will do: Style the glove customisation area (glove options, selected state) and game page (holes grid, score/worm count, tray) using the project CSS guide; make it responsive.	What students will do: Quick 'design review': 4 students project their page; class uses the 4 design rules to give feedback.
Evidence tool: Oral questioning ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Rubric ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: 3 game UI screenshots.	Resources: VS Code; QR 'Design the glove customization area'; project CSS sources.	Resources: Display board; rule checklist.
Support (low performers / SEN): Rules written with icons.	Support (low performers / SEN): CSS snippets to adapt; focus on glove area only.	Support (low performers / SEN): Feedback starters.
Stretch (fast learners / gifted): Explain contrast in terms of accessibility for colour-blind users.	Stretch (fast learners / gifted): Add a media query for under 600 px and a colour palette with CSS variables.	Stretch (fast learners / gifted): Give feedback naming the exact CSS property to change.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 6 min Re-teach parent vs child flex (3 min). Model glove area: radio/selectable images with a .selected class; show border-radius, box-shadow; demonstrate responsive check in DevTools. Share the rubric.				What I will watch for / likely responses: Over-designing and running out of time; images not showing (wrong path); low-contrast colours. Response: 'It looks different on my phone'.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Students run a professional-style design review using agreed UI rules, including accessibility (contrast).				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Self-assessment on rubric + exit question: name one responsive technique used. Learners' questions.			
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: finish styling and upload screenshots at laptop and phone widths. Read student book on event listeners.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Design rules gave quality focus; several students used colours from their national flags thoughtfully. Responsive checks done by 75%.	What will I change next time? Set a 15-minute checkpoint; some spent all time on colours. Pre-check image paths with a quick checklist.	Students needing follow-up: 10/1, 10/3: students with broken image paths; SEN students need a 1-page CSS reference.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>

--

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 12 (8-12 Nov 2026) - Period 1	Unit 4 - 4.1 Setting the Game Elements (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 12 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Styled pages uploaded by 80%; image paths main issue. Today JavaScript begins: event listeners to make the index page respond.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students script the index page with event listeners (click, input), use the DOM to read player name/glove choice and pass data to the game page with sessionStorage. Sprint 4.1 obj. 1-2; CSTA 3A-AP-16; Challenge 1.

Success criteria — what will successful learning look / sound like?

I link script.js; I add an event listener to a button; I read and store the player name and glove in sessionStorage and read it on the game page.

Key knowledge / skill / understanding:

DOM = page as a tree; events trigger functions; sessionStorage keeps data for the session.

Likely misconception / access or challenge need:

sessionStorage keeps data forever; onclick in HTML and addEventListener are unrelated.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 10 min	Strategy: Problem solving ☐ Time: 20 min	Strategy: Think-pair-share ☐ Time: 7 min
What students will do: Watch-and-try: select an element with getElementById, add a click listener that changes text; console.log values in DevTools.	What students will do: Script index page: read player name, store chosen glove, validate empty name, and on Start save to sessionStorage and open game.html; on game.html display the name.	What students will do: Real-life link: where do websites remember you (cart, language choice)? Pairs compare sessionStorage vs cookies/localStorage and privacy concerns.
Evidence tool: Mini-whiteboards ☐ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Exit ticket ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: VS Code; browser console; QR 'Event listeners'.	Resources: Project source 'Communicate between the web pages'; student book 4.1.	Resources: Slide with examples; link to Unit 1 Data Privacy.
Support (low performers / SEN): Code template with blanks; pair with a buddy.	Support (low performers / SEN): Step-by-step flowchart and starter code.	Support (low performers / SEN): Picture examples of online shopping cart.
Stretch (fast learners / gifted): Use querySelectorAll to add listeners to all gloves.	Stretch (fast learners / gifted): Challenge 1: 6x5 interactive grid highlighting clicked cell.	Stretch (fast learners / gifted): Explain privacy risks of storing personal data.

3 PREPARE — What do I need to do so students can succeed?		4 RESPOND — What will I do with what I see and hear?	
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned		If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve	
My setup / modelling: Time: 6 min Hook: click 'Start' on the finished game - how does page 2 know my name? Model DOM tree on the board, event listener syntax, console.log debugging, sessionStorage.setItem/getItem. Key words: event, DOM, propagation, session.		What I will watch for / likely responses: Script tag in wrong place (element null); typos in ids; using = instead of ===; forgetting to check Console for errors. Likely: 'nothing happens when I click'.	
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Debugging routine with DevTools console taught explicitly; links JavaScript storage to data-privacy ethics from Unit 1.		Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket (Forms): order 4 lines of an event listener; what sessionStorage does. Learners' questions.	
Progress recorded / shared: ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio		Homework / platform <i>(e.g. Madrasati)</i> Madrasati: finish index script; Challenge 1 grid (optional). Watch QR video 'Loops in JavaScript'.	

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>							
What worked — and how do I know? Console debugging helped: students read errors instead of asking straight away. Privacy discussion drew on different cultural views of sharing data.			What will I change next time? Model the script placement (end of body / defer) first - most 'null' errors came from that. More pair programming for beginners.			Students needing follow-up: Approx. 4 per class still cannot pass data between pages; small-group help next lesson. Gifted: grid challenge done by 6 students.	

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type · click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 12 (8-12 Nov 2026) - Period 2	Unit 4 - 4.1 Setting the Game Elements (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 12 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket: 70% ordered listener correctly; sessionStorage understood by 80%. Today: loops and asynchronous timing for the game.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students use for/while loops and asynchronous methods (setTimeout, setInterval, clearInterval) to repeat actions and time events. Sprint 4.1 obj. 3-4; Challenges 2-3; CSTA 3A-AP-15.

Key knowledge / skill / understanding:

Loops repeat; 1 s = 1000 ms; asynchronous code runs later, not in order.

Success criteria — what will successful learning look / sound like?

I write a for loop to repeat code; I use setTimeout/setInterval with milliseconds correctly; I stop a timer with clearInterval; my countdown works.

Likely misconception / access or challenge need:

setTimeout pauses the program; loops always need a counter from 0.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Inquiry / investigation ☒ Time: 8 min	Strategy: Problem solving ☒ Time: 20 min	Strategy: Cooperative learning ☒ Time: 8 min
What students will do: Predict-then-run: 4 short code snippets (loop, setTimeout order). Students predict console output, run, then explain differences.	What students will do: Challenge 2: countdown timer from 10 that disappears at 0 and shows a birthday message (or Eid/National Day greeting); then add a loop creating 9 holes dynamically.	What students will do: Pairs swap code and trace each other's timer with a trace table (time, value, output).
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Snippets in browser console.	Resources: VS Code; QR 'Asynchronous methods'; source files.	Resources: Trace table template.
Support (low performers / SEN): Annotated snippets; buddy support.	Support (low performers / SEN): Countdown starter with comments; flowchart.	Support (low performers / SEN): Partially filled trace table.
Stretch (fast learners / gifted): Explain why setTimeout(...,0) still runs last.	Stretch (fast learners / gifted): Challenge 3: print primes up to n using loops and if-else.	Stretch (fast learners / gifted): Add an edge case (n = 0 or negative) to test.

3 PREPARE — What do I need to do so students can succeed?	4 RESPOND — What will I do with what I see and hear?
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned	If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve
My setup / modelling: Time: 7 min Hook: a countdown on the board - how do games keep time? Model a for loop with a trace table; model setInterval with a counter and clearInterval; convert seconds to ms on the board. Share success criteria.	What I will watch for / likely responses: Infinite loops freezing the tab; forgetting clearInterval; using seconds not ms; counter declared inside the interval. Response: 'my timer goes negative'.
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Students choose the celebration message (birthday, Eid, Diwali, National Day) - culturally responsive context; trace tables build computational thinking.	Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit check: write a setInterval countdown from 5 in pseudocode; convert 2.5 s to ms. Learners' questions.
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio	Homework / platform <i>(e.g. Madrasati)</i> Madrasati: finish countdown; try the primes challenge (optional). Review student book 4.2 'Start the game'.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know? Predict-then-run created real surprise and talk. Celebration choice made it personal and inclusive. 80% built a working countdown.	What will I change next time? Show how to recover from an infinite loop (close tab) before practice. Trace tables need a worked example first.	Students needing follow-up: Students who froze browsers repeatedly (10/4, 10/5) need loop-condition practice. Inform parents of 5 students behind on submissions.
---	--	---

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 13 (15-19 Nov 2026) - Period 1	Unit 4 - 4.2 Core Logic of the Game (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 13 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Countdowns working for ~80%; ms conversion now secure. Today: start the game, make worms pop out at random times in random holes.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students build core game logic: start the game, make worms pop out, set random times (Math.random range formula) and choose random holes. Sprint 4.2 obj. 1-4; CSTA 3A-AP-16; Activity 1.

Success criteria — what will successful learning look / sound like?

I start the game on a button click; I generate a random time between min and max; I choose a random hole; worms pop out repeatedly.

Key knowledge / skill / understanding:

Math.random() gives 0 to <1; min + rand*(max-min); Math.floor for whole numbers; array of holes.

Likely misconception / access or challenge need:

Math.random gives whole numbers; same worm can't appear twice in the same hole.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Problem solving ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 22 min	Strategy: Debate ☒ Time: 7 min
What students will do: Activity 1: calculate a random time between 2000 and 3000 ms for rand = 0.83 by hand, then verify in Chrome's Console.	What students will do: Code along: startGame(), randomTime(), randomHole() and popOut() using setTimeout; worms appear in random holes until the game ends.	What students will do: Is a game fair if it is random? Teams argue for/against using real examples (dice, sports draws) and suggest how to make randomness feel fair.
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Oral questioning ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: Chrome Console; formula slide.	Resources: VS Code; project source 'Core logic'; student book 4.2.	Resources: Debate prompt; examples.
Support (low performers / SEN): Calculator; worked example with 0.5.	Support (low performers / SEN): Code skeleton with functions named; pair programming.	Support (low performers / SEN): Sentence starters.
Stretch (fast learners / gifted): Write a function randomBetween(min,max) and test 5 values.	Stretch (fast learners / gifted): Prevent the same hole twice in a row (compare with lastHole).	Stretch (fast learners / gifted): Link to probability: chance of the same hole twice with 9 holes.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 6 min Hook: roll a dice - how can a computer 'roll'? Model Math.random, the range formula, Math.floor with an array of holes. Show the flow: start -> random hole -> pop out -> hide -> repeat. Share success criteria.				What I will watch for / likely responses: Using Math.round giving index 9 (out of range); setTimeout not called again; CSS class for 'up' worm missing. Likely: 'worms appear all at once'.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Numeracy and probability embedded in coding; students debate fairness of randomness, linking maths to game design ethics.				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket: compute min + 0.25*(max-min) for 1000-4000; why Math.floor not Math.round? Learners' questions.			
Progress recorded / shared: ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: finish pop-out logic; upload a 20-second screen recording or screenshot. Optional: Challenge 3 Start/Stop random colour.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Calculating by hand first made the code make sense; probability debate engaged quieter maths-strong students. 75% had worms popping by the end.	What will I change next time? Show the off-by-one error deliberately next time. Give a skeleton to all students to save typing time.	Students needing follow-up: Students whose worms don't hide (CSS class issue) - approx. 3 per class; peer mentors assigned for next lesson.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☒ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Digital students use it · 2-1-1-4 ☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Real-life ① application · 2-1-1-5 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☒ 2 ☐ 3 ☐ C ☐ H
Create something new · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Discussion expressing ideas · 2-1-1-8 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Pair / group cooperative work · 2-1-1-8 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Learner choice independent work · 3-2-1-6 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Self-assessment 2-2-1-1 ☐ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Peer assessment 2-2-1-1 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	SEN / low specific support · 2-1-1-3 ☒ 1 ☒ 2 ☒ 3 ☐ C ☐ H	Gifted specific stretch · 2-1-1-3 ☒ 1 ☒ 2 ☒ 3 ☐ C ☐ H

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 13 (15-19 Nov 2026) - Period 2	Unit 4 - 4.2 Core Logic of the Game (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 13 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket: 85% correct on range formula; Math.floor reason weaker. Today: scoring, tray, missed worms, results and edge cases.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students complete the game logic: score and worm count, add worms to the tray, calculate missed worms, display results with alert, return to index, use a gameOn variable and fix edge cases. Sprint 4.2 obj. 5-11; CSTA 3A-AP-21.

Success criteria — what will successful learning look / sound like?

My score increases only when a visible worm is clicked; missed worms = total - caught; results show at the end; clicks after game over do nothing.

Key knowledge / skill / understanding:

Variables store state; conditions check gameOn; edge cases are unusual inputs that break logic.

Likely misconception / access or challenge need:

Clicking fast counts multiple times is fine; testing once is enough.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 12 min	Strategy: Problem solving ☐ Time: 18 min	Strategy: Cooperative learning ☐ Time: 7 min
What students will do: Code along: score and worm-count variables, click listener on worms, add worm image to tray, missed = total - caught.	What students will do: Implement results alert, back to index, and gameOn flag; then hunt edge cases (double click, click after end, empty name) and fix at least two.	What students will do: Playtest swap: pairs play another pair's game and log bugs in a shared sheet (bug, steps, expected, actual).
Evidence tool: Mini-whiteboards ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: Project source; student book 4.2.	Resources: Edge-case card; browser console.	Resources: Shared Teams/Excel bug log.
Support (low performers / SEN): Skeleton code; checklist of variables.	Support (low performers / SEN): Edge-case card with hints for 2 cases.	Support (low performers / SEN): Bug log with one example row.
Stretch (fast learners / gifted): Store high score in sessionStorage.	Stretch (fast learners / gifted): Write a short test plan table with 5 cases and expected results.	Stretch (fast learners / gifted): Prioritise bugs by severity.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 6 min Hook: a buggy version where score goes up when clicking empty holes. Model variables for state, the gameOn check, and how a test plan works. Explain playtesting roles.				What I will watch for / likely responses: Score updating on hidden worms; alert loops; gameOn never reset; students fixing bugs by deleting features. Response: 'it works on my computer' - test differently.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Professional playtesting with a shared bug log; students learn that software is tested by others before release.				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit check: write the formula for missed worms and one edge case you fixed. Learners' questions.			
Progress recorded / shared: ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: fix one bug from your playtest log; upload before/after code screenshot.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Bug log was a hit; students from different classes in later sections used the same format. 70% have a fully working game loop.	What will I change next time? Cut the modelling to 10 minutes; give more time to edge cases. Prepare a 'common bugs' slide.	Students needing follow-up: Students without a working game (approx. 5 per class): provide fixed source to continue; contact parents of 2 students with repeated missing work.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>							
Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☒ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Digital students use it · 2-1-1-4 ☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Real-life ① application · 2-1-1-5 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H

ALWAYS VISIBLE IN DELIVERY: Safe, respectful climate • every learner drawn in • purposeful use of time • smooth transitions • learner voice • specific feedback and next steps • students act on feedback
--

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type · click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 14 (22-26 Nov 2026) - Period 1	Unit 4 - 4.3 Game Enhancements
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 14 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Bug-fix homework: 75% fixed one bug; playtest logs good. Today: improve player experience with a custom cursor, custom popup and sound.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students customise the cursor (glove), replace alert() with a styled popup box, and add audio (background music, catch/game-over sounds, mute). Sprint 4.3 obj. 1-4; CSTA 3A-AP-19, 3A-AP-21.

Key knowledge / skill / understanding:

cursor: url() with fallback; classList show/hide; new Audio(), play(), volume; autoplay blocked until a click.

Success criteria — what will successful learning look / sound like?

I set a custom cursor with a fallback; my results popup shows and closes with a button; a sound plays when a worm is caught; players can mute.

Likely misconception / access or challenge need:

Any image size works as a cursor; alert() can be styled; music can autoplay on load.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☐ Time: 5 min	Strategy: Modelling / worked exam ☐ Time: 25 min	Strategy: Role play ☐ Time: 6 min
What students will do: Compare alert() vs a custom popup and silent vs sound versions of the game; agree 3 UX rules (clear, not annoying, player in control).	What students will do: Code along in 3 steps: 1) glove cursor (32x32 png); 2) results popup (overlay div, message, Restart button, classList toggle); 3) catch and game-over sounds + mute button.	What students will do: Player and developer: player tests the enhancements and gives feedback (too loud, popup unclear); developer makes one change and notes it in the change log.
Evidence tool: Oral questioning ☐ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Two demo builds of the game.	Resources: VS Code; QR 'Customize the cursor', 'Create a customized popup', 'Audio elements'; project sources.	Resources: Feedback checklist; headphones.
Support (low performers / SEN): Picture comparison with key words.	Support (low performers / SEN): Popup HTML/CSS and audio files ready; students write the JS lines only.	Support (low performers / SEN): Feedback phrases card.
Stretch (fast learners / gifted): Name an accessibility risk of sound-only feedback.	Stretch (fast learners / gifted): Challenge 1 audio player (play/pause/volume) or Challenge 3 image carousel.	Stretch (fast learners / gifted): Developer writes a change log entry with reason.

3 PREPARE — What do I need to do so students can succeed?	4 RESPOND — What will I do with what I see and hear?
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned	If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve
My setup / modelling: Time: 7 min Hook: play the game - the alert box interrupts and it is silent. Model CSS cursor with fallback; popup structure and classList.add/remove('show') with z-index; new Audio('catch.mp3').play() inside the click handler; mute toggle. Remind headphones and respectful volume.	What I will watch for / likely responses: Cursor image too large (ignored); popup hidden behind elements (z-index); autoplay error in Console; wrong audio path; overlapping sounds (reset currentTime). Likely: 'my cursor/sound doesn't work' - check size/path.
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> User-centred testing through player/developer role play; inclusive design with a mute control and visual feedback alongside sound.	Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Exit ticket: write the CSS for a custom cursor with fallback; why must audio start after a click? Learners' questions.
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio	Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload your game (zip) with cursor, popup and sound. Bring one animation idea for the gloves or worms.

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Three enhancements in one period worked because popup and audio starters were ready; 75% finished all three. Students chose music thoughtfully for peers from different backgrounds.	What will I change next time? Headphones for every PC; testing sound in a full room was noisy. Pre-check audio paths in each project folder.	Students needing follow-up: 10/2: students absent last week need the fixed core-logic source; 2 SEN students need the popup template on paper.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 14 (22-26 Nov 2026) - Period 2	Unit 4 - 4.4 Animations + Term 1 showcase
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 14 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Games with cursor/popup/sound uploaded by ~80%; mute done by 60%. Final period of Term 1: CSS animations, then a short showcase.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students add hover transitions and CSS @keyframes animations (glove swing, popup scale-in) triggered from JavaScript, finalise the worm game and show it to peers. Sprint 4.4 obj. 1-4; CSTA 3A-AP-16, 3A-AP-23; ISTE 6.d.

Key knowledge / skill / understanding:

transition = 2 states; @keyframes defines stages in %; add/remove a class in JS to replay; animationend event.

Success criteria — what will successful learning look / sound like?

I add :hover transitions to buttons; I write a 3-stop @keyframes animation; my glove animates when catching a worm; I explain one design decision to a visitor.

Likely misconception / access or challenge need:

Animations need JavaScript; % in keyframes means size; replaying needs a page refresh.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 12 min	Strategy: Experiment / lab ☐ Time: 12 min	Strategy: Stations / carousel ☐ Time: 13 min
What students will do: Code along: button hover (transform: scale + transition); glove @keyframes swing triggered by adding .catch on click and removing it on animationend; popup scale-in.	What students will do: Animation lab: tweak duration, timing function and iteration of your glove animation; record what changes. Optional: Challenge 3 rectangle-to-circle.	What students will do: Mini-showcase: half the class hosts their game, half visit and play, then swap; visitors score with the Forms peer rubric.
Evidence tool: Mini-whiteboards ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Portfolio / notebook work ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: VS Code; QR 'CSS animations'; project CSS source.	Resources: Lab record sheet; Challenge 3 page.	Resources: Forms peer rubric via QR on each PC; host script card.
Support (low performers / SEN): Ready CSS; students add one line of JS.	Support (low performers / SEN): Record sheet with 2 rows pre-filled.	Support (low performers / SEN): Host script card to explain the game.
Stretch (fast learners / gifted): Use cubic-bezier timing; add prefers-reduced-motion.	Stretch (fast learners / gifted): Challenge 1: three vehicles moving in a square path.	Stretch (fast learners / gifted): Host explains the code of one feature.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 5 min Hook: our game vs the same game with bouncing buttons and a swinging glove. Model transition vs animation; write @keyframes with 0%, 50%, 100%; show the class-toggle trigger and animationend. Explain showcase routine and respectful feedback; save a backup before changes.				What I will watch for / likely responses: Animation name mismatch; no duration so nothing moves; animation plays once only; last-minute changes breaking the game (backup!); vague peer feedback. Likely: 'it worked before!'			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Lab-style experimenting with animation variables, then an end-of-term showcase where every student is both host and reviewer.				Close / exit check <i>(summative + time for learners' questions)</i> Time: 8 min Summative reflection (Forms): what I learned in Units 2-4, my best feature, my next goal. Learners' questions and celebration.			
Progress recorded / shared: ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload final zipped game + 3-line README of design decisions. Share the game with family and note one suggestion.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Animations made the games feel finished; showcase built confidence, with peers translating for newer learners. 85% of games ran fully.	What will I change next time? Animation + showcase in one period was tight; next year give the showcase its own period. Collect backups earlier in the week.	Students needing follow-up: Students who did not finish (2-4 per class): extension to Term 2 week 1; use high achievers' games as exemplars.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>
