

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 8 (11-15 Oct 2026) - Period 2	Unit 2 - 2.3 Advance Video Editing (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 8 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Repair stations: 3 of 4 done by most; .gif palette now understood. Today we move to video, starting with resolution and aspect ratio numbers.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students set a project profile in OpenShot (resolution, aspect ratio, frame rate), import media files and modify clips on the timeline (trim, split, arrange, transitions). Sprint 2.3 obj. 1-3; ISTE 6.a.

Key knowledge / skill / understanding:

Profile = resolution + aspect ratio + fps; timeline tracks layer media; transitions join clips.

Success criteria — what will successful learning look / sound like?

I can pick a suitable profile and explain resolution, aspect ratio and frame rate; I can import media, trim/split clips and add a transition.

Likely misconception / access or challenge need:

Higher fps always better; aspect ratio = resolution; editing the original files.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 20 min	Strategy: Role play ☒ Time: 8 min
What students will do: Compare a 16:9 and a 9:16 clip of the same scene. Discuss: Which platform suits each? What do 1920x1080 and 30 fps mean? Calculate frames in a 10-second clip.	What students will do: Follow along: create a project with a chosen profile, File > Import Files, drag clips to tracks, trim and split with Razor, reorder, add 2 transitions between clips. Save project.	What students will do: Pairs: 'client and editor'. Client gives a 15-second brief (e.g., school sports day reel); editor explains which profile and transitions they would choose and why.
Evidence tool: Oral questioning ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Two sample clips; profile info slide.	Resources: OpenShot; sample videos go.qubitcs.com/vXP1; QR install 338u.	Resources: Brief cards; checklist.
Support (low performers / SEN): Glossary card: resolution, aspect ratio, frame rate, with diagrams.	Support (low performers / SEN): Clips pre-downloaded; step card; work with 2 clips only.	Support (low performers / SEN): Brief cards with choices to pick from.
Stretch (fast learners / gifted): Compare data size of 24 vs 60 fps for the same clip.	Stretch (fast learners / gifted): Use 4 clips and match transition style to the story.	Stretch (fast learners / gifted): Editor adds a justification using numbers (fps, resolution).

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: 15-sec school-event reel made in OpenShot. Model: Choose Profile; import; drag to track; Razor tool; drag-to-overlap transition; save .osp. Name the panels (Project Files, Timeline, Preview). Share success criteria.

What is new or innovative in this lesson? (ETEC looks for this)

Role play client/editor brings real-world media-industry language; numeracy through fps x seconds and resolution calculations.

Progress recorded / shared:

- ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Wrong profile mismatch leading to black bars; clips placed on the same track overlapping by accident; not saving project; OpenShot crash on slow PCs (save often). Response: 'the video looks stretched'.

Close / exit check (summative + time for learners' questions) Time: 8 min

Exit ticket: 1) define aspect ratio 2) frames in 12 s at 25 fps 3) one transition you used. Learners' questions.

Homework / platform (e.g. Madrasati)

Madrasati: plan a 20-second video (storyboard of 4 frames) on 'My culture in 20 seconds' - photos/clips must be your own or royalty-free.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Numbers made sense when calculated with the real clip; role play produced good vocabulary. Most saved a project with 2 transitions.

What will I change next time?

OpenShot was slow on 6 PCs - install check before the lesson and keep clips short (under 30 s). Give the profile glossary earlier.

Students needing follow-up:

Students with no OpenShot at home: provide lab time on Tuesday break. 10/3: 2 SEN students need 1:1 check on the timeline.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☒ 3 ☒ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☒ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Digital students use it · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Real-life ① application · 2-1-1-5 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H
