Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 9 (18-22 Oct 2026) - Period 2	Unit 2 - Assessment (Photo & Video Editing)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 9 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Videos submitted by ~85%; keyframes and export modes understood by most. Today's assessment checks all Unit 2 outcomes; extra time for SEN.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Assess Unit 2: selection tools, filters, colour tools, repair tools (GIMP) and OpenShot profiles, effects and export, through a written quiz and a practical task aligned to the ToS. Sprint 2.1-2.3.

Success criteria — what will successful learning look / sound like?

I answer MCQ, fill-in and matching items accurately; I complete a practical GIMP task to the given specification; I reflect honestly on my Unit 2 progress.

Key knowledge / skill / understanding:

All Unit 2 vocabulary: border, filters, jagged, pattern, brush stroke, compress, time-lapse, keyframe.

Likely misconception / access or challenge need:

Rushing the practical without reading the spec; EAL students: read questions aloud if needed.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Problem solving ☒ Time: 15 min	Strategy: Project-based task ☒ Time: 22 min	Strategy: Discussion / dialogue ☒ Time: 5 min
What students will do: Written section (Forms): 6 MCQ, 4 fill-in-the-blanks, 5 match-the-following and 2 short answers (Simple vs Advanced export; how to make an image look old).	What students will do: Practical: given an image pack, isolate a subject, place it on a new background, apply one colour correction and one artistic filter, then export as .png with a credit line.	What students will do: Self-assessment: students rate their confidence on each Unit 2 skill (traffic light) and write one target for the next unit.
Evidence tool: Short quiz ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Self-assessment checklist ☒ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group
Resources: Forms quiz from Unit 2 exercise bank; ToS.	Resources: GIMP; assessment image pack; practical spec + marking rubric.	Resources: Traffic-light self-assessment sheet (Forms).
Support (low performers / SEN): Read-aloud option; glossary allowed for EAL; +10% time for SEN.	Support (low performers / SEN): Simplified spec with checklist ticks.	Support (low performers / SEN): Smiley-face scale + short phrases.
Stretch (fast learners / gifted): Extended answer: compare two background-removal methods.	Stretch (fast learners / gifted): Add a clone repair and a fuzzy border; justify choices in 2 lines.	Stretch (fast learners / gifted): Write a personal learning goal (ISTE 1.a).

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 4 min

Clear instructions: timing, rules for practical, where to save (Assessments folder, file name Class_Name_U2). Read through the rubric and success criteria. Remind students to check spelling of file names. No modelling; quick reassurance for anxious learners.

What is new or innovative in this lesson? (ETEC looks for this)

Assessment combines a digital auto-marked quiz with a practical rubric and student self-assessment, giving 3 types of evidence.

Progress recorded / shared:

- ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Students stuck on export; students opening the internet for answers; anxiety among new students - circulate calmly, read questions aloud on request, keep extra time for SEN plan.

Close / exit check (summative + time for learners' questions) Time: 4 min

Collect files; quick 1-minute check that every file is saved correctly. Learners' questions about next unit (Game Interface).

Homework / platform (e.g. Madrasati)

Madrasati: preview Unit 3 - install VS Code at home if possible (QR yCJk) and bring 1 idea for a simple web game.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Quiz average approx. 76%; practical rubric average level 3. Self-assessment matched teacher marks for most students - they know their gaps.

What will I change next time?

Practical spec was long for EAL learners: use bullet icons next time. Allow 5 more minutes for the practical.

Students needing follow-up:

Students below 50% (approx. 2-3 per class) for re-teach of selection tools; inform parents via gradebook comment.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*
