

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 11 (1-5 Nov 2026) - Period 1	Unit 3 - 3.2 Styling the Game Page (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 11 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Game pages complete for ~85%; gallery homework shows good layouts but weak HTML structure. Today: CSS Flexbox to lay out index page.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS) Students use CSS Flexbox (display:flex, flex-direction, justify-content, align-items, gap, flex-wrap) to style and lay out the index page. Sprint 3.2 obj. 1-2; Challenges 1-2; CSTA 3A-AP-16.	Success criteria — what will successful learning look / sound like? I link style.css; I use at least 4 flex properties correctly; my index page items are centred and spaced as in the design.
Key knowledge / skill / understanding: CSS selectors target elements; Flexbox arranges items along a main axis and a cross axis.	Likely misconception / access or challenge need: justify-content and align-items are the same; CSS must be inside HTML.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Gamification ☒ Time: 8 min	Strategy: Modelling / worked exam ☒ Time: 22 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: Flexbox Froggy-style challenge: on a projected game, teams predict the flex rule that moves the items into place and test it live.	What students will do: Challenge 1 then apply to project: create a div/flex layout as shown, then style index.html (body, header, form, buttons) with flex for centring and spacing.	What students will do: Pairs test each other's index page on a laptop and a phone-size window and record one layout issue + fix.
Evidence tool: Mini-whiteboards ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group
Resources: Flexbox practice page; display board.	Resources: VS Code; QR Flex properties; project CSS source; Challenge 1 picture.	Resources: Browser DevTools device mode; checklist.
Support (low performers / SEN): Property card with arrows showing axes.	Support (low performers / SEN): Starter CSS with gaps to fill (justify-content: ____).	Support (low performers / SEN): Checklist with pictures of good/bad layout.
Stretch (fast learners / gifted): Combine 3 properties in one answer.	Stretch (fast learners / gifted): Challenge 2: four background-image divs centred in a row with flex-wrap for small screens.	Stretch (fast learners / gifted): Suggest a media query to fix the issue.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: same page without and with CSS. Link stylesheet live. Draw main axis/cross axis on the board; model display:flex, justify-content, align-items, flex-direction with immediate browser refresh. Show DevTools to inspect.

What is new or innovative in this lesson? (ETEC looks for this)

Learning flex through a team game then transferring it to the real project; DevTools device mode introduces responsive testing.

Progress recorded / shared:

- ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Stylesheet path wrong (no styling at all); applying flex to the child not the parent; typos in property names. Likely response: 'nothing moves' - flex on wrong element.

Close / exit check (summative + time for learners' questions) Time: 7 min

Exit ticket: given a picture of a layout, write the 3 flex properties needed. Learners' questions.

Homework / platform (e.g. Madrasati)

Madrasati: complete Challenge 2 (four divs with background images in a row) or finish index styling; upload screenshot.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Gamified start worked; teams with mixed backgrounds cheered each other. Most applied flex correctly after the axis drawing.

What will I change next time?

Check the CSS link step first - 6 students lost time. Provide a printable flex cheat sheet.

Students needing follow-up:

Students who still mix up parent/child selectors (approx. 3 per class) - targeted mini re-teach next lesson.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

Literacy read + write · 2-1-1-6 ☐ 1 ☐ 2 ☐ 3 ☒ C ☐ H	Numeracy numbers / data · 2-1-1-6 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Digital students use it · 2-1-1-4 ☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	Digital research trusted sources · 2-1-1-4 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Real-life ① application · 2-1-1-5 ☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	Real-life ② application · 2-1-1-5 ☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	Inquiry experiment / research · 2-1-1-7 ☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	Thinking problem-solving · 2-1-1-7 ☒ 1 ☒ 2 ☐ 3 ☐ C ☐ H

ALWAYS VISIBLE IN DELIVERY: Safe, respectful climate • every learner drawn in • purposeful use of time • smooth transitions • learner voice • specific feedback and next steps • students act on feedback

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 11 (1-5 Nov 2026) - Period 2	Unit 3 - 3.2 Styling the Game Page (2/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 11 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Exit ticket: 80% wrote correct flex rules; parent/child confusion remains. 3-min re-teach, then style the game page.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students design the glove customisation area and style the game page (holes grid, score board, tray) with a responsive layout. Sprint 3.2 obj. 3-4; Challenge 3; CSTA 3A-AP-21; ISTE 4.c.

Success criteria — what will successful learning look / sound like?

I style the glove area so the selected glove is highlighted; I style holes and score with consistent colours/fonts; my game page works on laptop and phone widths.

Key knowledge / skill / understanding:

Classes reuse styles; :hover/:focus; responsive layouts with flex-wrap and media queries.

Likely misconception / access or challenge need:

Fixed pixel widths make it responsive; more colours = better design.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☒ Time: 6 min	Strategy: Project-based task ☒ Time: 24 min	Strategy: Cooperative learning ☒ Time: 7 min
What students will do: Discuss good game UI: show 3 game screens; class agrees on 4 design rules (contrast, consistent font, clear buttons, space).	What students will do: Style the glove customisation area (glove options, selected state) and game page (holes grid, score/worm count, tray) using the project CSS guide; make it responsive.	What students will do: Quick 'design review': 4 students project their page; class uses the 4 design rules to give feedback.
Evidence tool: Oral questioning ☒ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Rubric ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: 3 game UI screenshots.	Resources: VS Code; QR 'Design the glove customization area'; project CSS sources.	Resources: Display board; rule checklist.
Support (low performers / SEN): Rules written with icons.	Support (low performers / SEN): CSS snippets to adapt; focus on glove area only.	Support (low performers / SEN): Feedback starters.
Stretch (fast learners / gifted): Explain contrast in terms of accessibility for colour-blind users.	Stretch (fast learners / gifted): Add a media query for under 600 px and a colour palette with CSS variables.	Stretch (fast learners / gifted): Give feedback naming the exact CSS property to change.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 6 min Re-teach parent vs child flex (3 min). Model glove area: radio/selectable images with a .selected class; show border-radius, box-shadow; demonstrate responsive check in DevTools. Share the rubric.				What I will watch for / likely responses: Over-designing and running out of time; images not showing (wrong path); low-contrast colours. Response: 'It looks different on my phone'.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Students run a professional-style design review using agreed UI rules, including accessibility (contrast).				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Self-assessment on rubric + exit question: name one responsive technique used. Learners' questions.			
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: finish styling and upload screenshots at laptop and phone widths. Read student book on event listeners.			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Design rules gave quality focus; several students used colours from their national flags thoughtfully. Responsive checks done by 75%.	What will I change next time? Set a 15-minute checkpoint; some spent all time on colours. Pre-check image paths with a quick checklist.	Students needing follow-up: 10/1, 10/3: students with broken image paths; SEN students need a 1-page CSS reference.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>
