

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 14 (22-26 Nov 2026) - Period 2	Unit 4 - 4.4 Animations + Term 1 showcase
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 14 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Games with cursor/popup/sound uploaded by ~80%; mute done by 60%. Final period of Term 1: CSS animations, then a short showcase.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students add hover transitions and CSS @keyframes animations (glove swing, popup scale-in) triggered from JavaScript, finalise the worm game and show it to peers. Sprint 4.4 obj. 1-4; CSTA 3A-AP-16, 3A-AP-23; ISTE 6.d.

Key knowledge / skill / understanding:

transition = 2 states; @keyframes defines stages in %; add/remove a class in JS to replay; animationend event.

Success criteria — what will successful learning look / sound like?

I add :hover transitions to buttons; I write a 3-stop @keyframes animation; my glove animates when catching a worm; I explain one design decision to a visitor.

Likely misconception / access or challenge need:

Animations need JavaScript; % in keyframes means size; replaying needs a page refresh.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 12 min	Strategy: Experiment / lab ☐ Time: 12 min	Strategy: Stations / carousel ☐ Time: 13 min
What students will do: Code along: button hover (transform: scale + transition); glove @keyframes swing triggered by adding .catch on click and removing it on animationend; popup scale-in.	What students will do: Animation lab: tweak duration, timing function and iteration of your glove animation; record what changes. Optional: Challenge 3 rectangle-to-circle.	What students will do: Mini-showcase: half the class hosts their game, half visit and play, then swap; visitors score with the Forms peer rubric.
Evidence tool: Mini-whiteboards ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Portfolio / notebook work ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☒ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: VS Code; QR 'CSS animations'; project CSS source.	Resources: Lab record sheet; Challenge 3 page.	Resources: Forms peer rubric via QR on each PC; host script card.
Support (low performers / SEN): Ready CSS; students add one line of JS.	Support (low performers / SEN): Record sheet with 2 rows pre-filled.	Support (low performers / SEN): Host script card to explain the game.
Stretch (fast learners / gifted): Use cubic-bezier timing; add prefers-reduced-motion.	Stretch (fast learners / gifted): Challenge 1: three vehicles moving in a square path.	Stretch (fast learners / gifted): Host explains the code of one feature.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
- ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
- ☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 5 min

Hook: our game vs the same game with bouncing buttons and a swinging glove. Model transition vs animation; write @keyframes with 0%, 50%, 100%; show the class-toggle trigger and animationend. Explain showcase routine and respectful feedback; save a backup before changes.

What is new or innovative in this lesson? (ETEC looks for this)

Lab-style experimenting with animation variables, then an end-of-term showcase where every student is both host and reviewer.

Progress recorded / shared:

- ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
- ☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Animation name mismatch; no duration so nothing moves; animation plays once only; last-minute changes breaking the game (backup!); vague peer feedback. Likely: 'it worked before!'

Close / exit check (summative + time for learners' questions) Time: 8 min

Summative reflection (Forms): what I learned in Units 2-4, my best feature, my next goal. Learners' questions and celebration.

Homework / platform (e.g. Madrasati)

Madrasati: upload final zipped game + 3-line README of design decisions. Share the game with family and note one suggestion.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Animations made the games feel finished; showcase built confidence, with peers translating for newer learners. 85% of games ran fully.

What will I change next time?

Animation + showcase in one period was tight; next year give the showcase its own period. Collect backups earlier in the week.

Students needing follow-up:

Students who did not finish (2-4 per class): extension to Term 2 week 1; use high achievers' games as exemplars.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

Literacy read + write · 2-1-1-6	Numeracy numbers / data · 2-1-1-6	Digital students use it · 2-1-1-4	Digital research trusted sources · 2-1-1-4	Real-life ① application · 2-1-1-5	Real-life ② application · 2-1-1-5	Inquiry experiment / research · 2-1-1-7	Thinking problem-solving · 2-1-1-7
☐ 1 ☐ 2 ☒ 3 ☒ C ☐ H	☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	☒ 1 ☒ 2 ☐ 3 ☐ C ☒ H	☒ 1 ☐ 2 ☐ 3 ☐ C ☐ H	☐ 1 ☐ 2 ☒ 3 ☐ C ☐ H	☐ 1 ☐ 2 ☐ 3 ☐ C ☒ H	☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H	☐ 1 ☒ 2 ☐ 3 ☐ C ☐ H
Create something new · 2-1-1-7	Discussion expressing ideas · 2-1-1-8	Pair / group cooperative work · 2-1-1-8	Learner choice independent work · 3-2-1-6	Self-assessment 2-2-1-1	Peer assessment 2-2-1-1	SEN / low specific support · 2-1-1-3	Gifted specific stretch · 2-1-1-3
