MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT *Plan the learning first; let the checklist follow. Click a field to type · click a box to tick it.*

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 8 (11-15 Oct 2026) - Period 1	Unit 2 - 2.2 Advance Photo Editing

Pacing (2-1-1-2): ☑ On plan ☐ Ahead ☐ Behind

Weeks ahead / behind: 0 **Week / lesson:** Week 8 / Lesson 1 of 2

Starting point (2-2-1-3): *What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it?*

Uploads: 80% submitted; credits improving. Exit check showed filters secure. Today: colour correction and repair tools, with an export routine.

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — *trace to the curriculum / standard and the table of specifications (ToS)*

Students improve colour (Color Enhance, Color Balance), straighten an image, and repair photos with Red Eye Removal, Clone and Despeckle; export .png/.gif. Sprint 2.2 obj. 1-5; Challenges 1-3; CSTA 3A-DA-09.

Success criteria — *what will successful learning look / sound like?*

I can balance colour by range (shadows/midtones/highlights); I can straighten with the Measure tool; I can use 2 of 3 repair tools; I export in the right format.

Key knowledge / skill / understanding:

Colour = RGB values; Clone is a Paint tool copying pixels; Despeckle reduces noise; .gif limited to 256 colours.

Likely misconception / access or challenge need:

Brightness = colour balance; Clone = copy/paste a layer; red eye can't be fixed.

2 PROOF — What will students do to show they have learned it?

Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 *student task + evidence of learning*

Strategy: Storytelling **Time:** 6 min

What students will do:

'Tina's family photo' (exercise Q3): a tilted, dull flash photo with red eyes. Students list what is wrong and which tool fixes each problem on whiteboards.

Evidence tool: Mini-whiteboards

Assessment: ☑ Diagnostic ☐ Formative ☐ End

Grouping: ☑ Individual ☐ Pair ☐ Group

Resources:

Story slide; whiteboards.

Support (low performers / SEN):

Picture story with key words: flash, tilt, dull.

Stretch (fast learners / gifted):

Explain why red eye happens (light reflecting off the retina).

ACTIVITY 2 *student task + evidence of learning*

Strategy: Stations / carousel **Time:** 24 min

What students will do:

Four repair stations (6 min each): 1) Color Enhance + Color Balance, export .png; 2) Measure tool > Straighten; 3) Red Eye Removal with Threshold; 4) Clone a pattern (Ctrl+click) or Despeckle a noisy scan, export .gif.

Evidence tool: Practical / performance task

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☐ Individual ☐ Pair ☑ Group

Resources:

GIMP; images from pack; QR videos aCT4, hCYG, WCUC, KCIT, oCOW; station cards.

Support (low performers / SEN):

Station cards with screenshots; peer helper at each station; aim for 2 stations.

Stretch (fast learners / gifted):

Hide an unwanted object with Clone so no one can tell; compare .png vs .gif file sizes.

ACTIVITY 3 *student task + evidence of learning*

Strategy: Cooperative learning **Time:** 7 min

What students will do:

Groups make a 'repair guide' card for one tool (menu path, 3 steps, one tip) and post it on Teams as a class help library for the Unit 2 assessment.

Evidence tool: Peer-assessment checklist

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☐ Individual ☐ Pair ☑ Group

Resources:

Teams channel; card template.

Support (low performers / SEN):

Template with headings filled.

Stretch (fast learners / gifted):

Add a 'common mistake + fix' box.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

☑ Hook / prior learning ☑ Explain or model ☑ Success criteria shared

☑ Key vocabulary / examples ☑ Real-life connection ☑ Clear instructions / resources

☑ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: three damaged photos (dull, tilted, red eye). Model in 1 minute each: Colors > Color Balance by range; Measure tool > Straighten; select eyes > Filters > Enhance > Red Eye Removal; Ctrl+click clone source. Show the export routine: File > Export As > type > Export. Explain station timer.

What is new or innovative in this lesson? *(ETEC looks for this)*

Four-station repair lab plus a student-made help library on Teams that is reused for assessment revision.

Progress recorded / shared:

☑ Gradebook ☑ Parents ☑ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

☑ Re-teach ☑ Regroup ☑ Give extra support

☑ Stretch ☑ Have students redo / improve

What I will watch for / likely responses:

Color Balance without choosing a range; measuring a vertical line; Red Eye without selecting eyes; Clone source not set; 'Save' vs 'Export' confusion; .gif losing colours. Likely: over-saturated colours - ask 'Does it look natural?'

Close / exit check *(summative + time for learners' questions)* Time: 7 min

Exit ticket (Forms): which menu holds Color Enhance; Clone belongs to which tool group; why did the .gif look different? Learners' questions.

Homework / platform *(e.g. Madrasati)*

Madrasati: upload one before/after repaired photo. Complete Unit 2 'Match the following' and 'Fill in the blanks'.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Stations moved quickly with timers; repair cards used Arabic + English labels, which helped EAL peers. Most completed 3 of 4 stations.

What will I change next time?

Four stations in one period is tight: give a 1-minute reset and let slower groups do 2 stations. Explain the .gif palette limit before station 4.

Students needing follow-up:

10/1, 10/5: a few students confused Clone with copy/paste. Parents of 3 students informed about missing uploads.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

Literacy read + write · 2-1-1-6	Numeracy numbers / data · 2-1-1-6	Digital students use it · 2-1-1-4	Digital research trusted sources · 2-1-1-4	Real-life ① application · 2-1-1-5	Real-life ② application · 2-1-1-5	Inquiry experiment / research · 2-1-1-7	Thinking problem-solving · 2-1-1-7

ALWAYS VISIBLE IN DELIVERY: Safe, respectful climate • every learner drawn in • purposeful use of time • smooth transitions • learner voice • specific feedback and next steps • students act on feedback

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT *Plan the learning first; let the checklist follow. Click a field to type · click a box to tick it.*

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 8 (11-15 Oct 2026) - Period 2	Unit 2 - 2.3 Advance Video Editing (1/2)

Pacing (2-1-1-2): ☑ On plan ☐ Ahead ☐ Behind

Weeks ahead / behind: 0 **Week / lesson:** Week 8 / Lesson 2 of 2

Starting point (2-2-1-3): *What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it?*

Repair stations: 3 of 4 done by most; .gif palette now understood. Today we move to video, starting with resolution and aspect ratio numbers.

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — *trace to the curriculum / standard and the table of specifications (ToS)*

Students set a project profile in OpenShot (resolution, aspect ratio, frame rate), import media files and modify clips on the timeline (trim, split, arrange, transitions). Sprint 2.3 obj. 1-3; ISTE 6.a.

Success criteria — *what will successful learning look / sound like?*

I can pick a suitable profile and explain resolution, aspect ratio and frame rate; I can import media, trim/split clips and add a transition.

Key knowledge / skill / understanding:

Profile = resolution + aspect ratio + fps; timeline tracks layer media; transitions join clips.

Likely misconception / access or challenge need:

Higher fps always better; aspect ratio = resolution; editing the original files.

2 PROOF — What will students do to show they have learned it?

Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 *student task + evidence of learning*

Strategy: Discussion / dialogu **Time:** 8 min

What students will do:

Compare a 16:9 and a 9:16 clip of the same scene. Discuss: Which platform suits each? What do 1920x1080 and 30 fps mean? Calculate frames in a 10-second clip.

Evidence tool: Oral questioning

Assessment: ☑ Diagnostic ☐ Formative ☐ End

Grouping: ☐ Individual ☐ Pair ☑ Group

Resources:

Two sample clips; profile info slide.

Support (low performers / SEN):

Glossary card: resolution, aspect ratio, frame rate, with diagrams.

Stretch (fast learners / gifted):

Compare data size of 24 vs 60 fps for the same clip.

ACTIVITY 2 *student task + evidence of learning*

Strategy: Modelling / worked exam **Time:** 20 min

What students will do:

Follow along: create a project with a chosen profile, File > Import Files, drag clips to tracks, trim and split with Razor, reorder, add 2 transitions between clips. Save project.

Evidence tool: Practical / performance task

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☑ Individual ☐ Pair ☐ Group

Resources:

OpenShot; sample videos go.qubitscs.com/vXP1; QR install 338u.

Support (low performers / SEN):

Clips pre-downloaded; step card; work with 2 clips only.

Stretch (fast learners / gifted):

Use 4 clips and match transition style to the story.

ACTIVITY 3 *student task + evidence of learning*

Strategy: Role play **Time:** 8 min

What students will do:

Pairs: 'client and editor'. Client gives a 15-second brief (e.g., school sports day reel); editor explains which profile and transitions they would choose and why.

Evidence tool: Peer-assessment checklist

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☐ Individual ☑ Pair ☐ Group

Resources:

Brief cards; checklist.

Support (low performers / SEN):

Brief cards with choices to pick from.

Stretch (fast learners / gifted):

Editor adds a justification using numbers (fps, resolution).

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

☑ Hook / prior learning ☑ Explain or model ☑ Success criteria shared

☑ Key vocabulary / examples ☑ Real-life connection ☑ Clear instructions / resources

☑ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: 15-sec school-event reel made in OpenShot. Model: Choose Profile; import; drag to track; Razor tool; drag-to-overlap transition; save .osp. Name the panels (Project Files, Timeline, Preview). Share success criteria.

What is new or innovative in this lesson? *(ETEC looks for this)*

Role play client/editor brings real-world media-industry language; numeracy through fps x seconds and resolution calculations.

Progress recorded / shared:

☑ Gradebook ☐ Parents ☑ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

☑ Re-teach ☑ Regroup ☑ Give extra support

☑ Stretch ☑ Have students redo / improve

What I will watch for / likely responses:

Wrong profile mismatch leading to black bars; clips placed on the same track overlapping by accident; not saving project; OpenShot crash on slow PCs (save often). Response: 'the video looks stretched'.

Close / exit check *(summative + time for learners' questions)* Time: 8 min

Exit ticket: 1) define aspect ratio 2) frames in 12 s at 25 fps 3) one transition you used. Learners' questions.

Homework / platform *(e.g. Madrasati)*

Madrasati: plan a 20-second video (storyboard of 4 frames) on 'My culture in 20 seconds' - photos/clips must be your own or royalty-free.

5 REFLECT — After the lesson

Complete within a day. This is reflective-practice evidence and feeds your next Starting point.

What worked — and how do I know?

Numbers made sense when calculated with the real clip; role play produced good vocabulary. Most saved a project with 2 transitions.

What will I change next time?

OpenShot was slow on 6 PCs - install check before the lesson and keep clips short (under 30 s). Give the profile glossary earlier.

Students needing follow-up:

Students with no OpenShot at home: provide lab time on Tuesday break. 10/3: 2 SEN students need 1:1 check on the timeline.

COVERAGE CHECK
