Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 7 (4-8 Oct 2026) - Period 2	Unit 2 - 2.1 Creative Photo Editing (2/2)

Pacing (2-1-1-2): ☑ On plan ☐ Ahead ☐ Behind

Weeks ahead / behind: 0 **Week / lesson:** Week 7 / Lesson 2 of 2

Starting point (2-2-1-3): *What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it?*

Exit ticket P1: 85% matched selection tools; Foreground Select steps shaky for ~5 per class. 3-min re-demo, then filters and painting effects.

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — *trace to the curriculum / standard and the table of specifications (ToS)*

Students change the look of images with GIMP filters: Old Photo (Defocus, Sepia, Mottle, Border), and painting effects GIMPressionist, Apply Canvas and Oilify. Sprint 2.1 obj. 2-4; Challenges 2-3; ISTE 6.b.

Success criteria — *what will successful learning look / sound like?*

I can turn a photo into an old-looking photograph with Filters > Decor > Old Photo; I can apply 2 artistic filters and explain what at least 2 settings change.

Key knowledge / skill / understanding:

Filters change pixel characteristics; Preview before OK; Work on Copy protects the original.

Likely misconception / access or challenge need:

Sepia = grayscale; more effects = better art. EAL: explain 'mottle', 'jagged', 'brush stroke'.

2 PROOF — What will students do to show they have learned it?

Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 *student task + evidence of learning*

Strategy: Discussion / dialogue **Time:** 6 min

What students will do:

Compare a modern and an old-look photo of the same monument. Pairs list 3 visible differences and guess which Old Photo options made them.

Evidence tool: Oral questioning

Assessment: ☑ Diagnostic ☐ Formative ☐ End

Grouping: ☐ Individual ☑ Pair ☐ Group

Resources:

Before/after monument slide; vocabulary list (border, jagged, filter).

Support (low performers / SEN):

Picture vocabulary; frame 'It looks ... because ...'.

Stretch (fast learners / gifted):

Predict what each Old Photo checkbox changes before testing.

ACTIVITY 2 *student task + evidence of learning*

Strategy: Stations / carousel **Time:** 22 min

What students will do:

Challenge 3 + Challenge 2 as stations (7 min each): A) monument from your own heritage > Old Photo with border; B) GIMPressionist (Paper/Brush tabs); C) Apply Canvas + Oilify. Record one setting and its effect per station.

Evidence tool: Observation checklist

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☐ Individual ☐ Pair ☑ Group

Resources:

GIMP; image pack PXI2; Wikimedia Commons; QR videos kCEN, 1CA9; station cards.

Support (low performers / SEN):

Station cards with numbered screenshots; images pre-resized to 1200 px.

Stretch (fast learners / gifted):

Combine 2 effects on separate layers with opacity; add a credit line.

ACTIVITY 3 *student task + evidence of learning*

Strategy: Gamification **Time:** 8 min

What students will do:

Quizizz 'Name that filter': see an edited image, pick the filter/setting used; bonus for the menu path.

Evidence tool: Digital quiz (Forms / Kahoot / Quizizz)

Assessment: ☐ Diagnostic ☑ Formative ☐ End

Grouping: ☑ Individual ☐ Pair ☐ Group

Resources:

Quizizz with 8 image questions.

Support (low performers / SEN):

Image-based answers; play in teams if needed.

Stretch (fast learners / gifted):

Bonus: exact menu path for each filter.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

☑ Hook / prior learning ☑ Explain or model ☑ Success criteria shared

☑ Key vocabulary / examples ☑ Real-life connection ☑ Clear instructions / resources

☑ Praise, recognition and reinforcement planned

My setup / modelling: Time: 7 min

Retrieval: 3-min re-demo of Foreground Select. Hook: 'How would this monument have looked in 1920?' Model Filters > Decor > Old Photo (Defocus, Sepia, Mottle, Border Size, Work on Copy), then Filters > Artistic > GIMPressionist with Preview on. Explain station rotation and the credit line: 'Photo: name, source'.

What is new or innovative in this lesson? *(ETEC looks for this)*

Culturally responsive brief: each student ages a monument from their own heritage, building a class 'world gallery'; stations keep everyone hands-on.

Progress recorded / shared:

☑ Gradebook ☐ Parents ☑ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

☑ Re-teach ☑ Regroup ☑ Give extra support

☑ Stretch ☑ Have students redo / improve

What I will watch for / likely responses:

Watermarked images (IP link); filters applied to the wrong layer; large images freezing PCs on Oilify; no image credit. Likely: 'Sepia makes it black and white' / 'I see no change' (settings too small).

Close / exit check *(summative + time for learners' questions)* Time: 7 min

Gallery: 3 students show work and name one setting. Exit check (Forms, 2 Qs) on Old Photo options + artistic filters. Learners' questions.

Homework / platform *(e.g. Madrasati)*

Madrasati: upload your old-photo monument + one painted image with source credits. Watch QR 'Enhance color' (aCT4).

5 REFLECT — After the lesson

Complete within a day. This is reflective-practice evidence and feeds your next Starting point.

What worked — and how do I know?

Heritage monuments got strong engagement: Egyptian, Pakistani, Filipino and Saudi students shared stories. Quizizz: 80% named the filter correctly.

What will I change next time?

Resize images before class (2 PCs froze on Oilify). Give the trusted image-site list at the start to save search time.

Students needing follow-up:

10/2 and 10/6: about 5 students did not finish station C. Two SEN students need printed station cards.
